

**Amendments to the Specification:**

Please replace the paragraphs as follows:

[0030]                One aspect of the attachment means 30 is shown in Figs. 1 and 2. The attachment means 30 include an elongated strap 32 preferably formed of a strong, lightweight, flexible material, such as ballistic material, i.e., ballistic grade ~~nylon~~ NYLON, etc. The strap 32 has a first end 34 and an opposed second end 36. Portions of the strap 32 are wound about shafts or legs 38 and 40, respectively, mounted in a connector 42.

[0042]                Another aspect of the latch or connector member according to the present invention is shown in Fig. 5. In this aspect, a strap 92 is in the form of a cord, formed of ballistic grade ~~nylon~~ NYLON, for example, having first and second free ends 94 and 96, respectively. Both ends of the strap 92 extend through bores in a latch body 98. From the latch body 98, the two ends of the cord 92 extend through a folded-over portion on the first end 16 of the enclosure 12.
